**OLIVETTI ECR 5920F
THE HOSPITABLE CASH REGISTER**

olivetti

THE HELPFUL MACHINE

The Olivetti ECR 5920F is the top-performing cash register with specialized functions particularly useful for hospitality sector operators. It features a flat, ergonomically-designed keyboard with highly-functional rubber cover and 42 PLU keys with easily-customized graphics. Each key can be used at three functional levels permitting direct selection of up to 126 articles.

The Olivetti ECR 5920F offers specialized capabilities for optimal table management, with concurrent monitoring of up to 70 receipts, keeps track of the number of guests and permits continuous update of orders and display of payment pro-forma receipts. The operator has the possibility of consulting open transactions and related current balance at any time.

Other major functions for the hospitality sector include the "Total Tray" which inserts the partial totals of the bill on the receipt and the exclusive "Divided Payment" function which makes it possible to divide the invoice into equal parts and issue the related individual receipts. The "Take Out" key permits selection of two different tax values for a product without duplicating the articles.

The Olivetti ECR 5920F is equipped with a 13,000-line electronic journal that becomes endless using the special circular memory setting which, once space has run out, automatically rewrites the older data without having to reset the journal.

All the above outstanding features are accompanied by a full range of classical professional cash register capabilities including, amongst others, a double alphanumeric display, a swivel type, adjustable, pop-up customer display, a silent alphanumeric thermal printer, high level security promoted by a selector with customizable keys and the possibility of operating in training mode.

Customizable keyboard, with 42 PLU keys and direct selection of up to 126 articles

Distinctive receipt, with a wide range of personalization options
